

Fabric Care for your Display

- Your fabric display print can be Machine washed in Cold Water, select a gentle Cycle wash. Mild detergents can be added but must be suitable for delicate Fabric Wash only like silks etc.
- Fabrics can be spot cleaned with extreme care **but can be subject to leaving marks**, we always recommend to wash the whole fabric print all together.
- Do not use Bleach - Do Not Tumble Dry - Do not Iron. Heat may damage your fabric Display.
- Fabric should be installed back onto frame to drip dry naturally which will prevent shrinking. Ensure Fabric Print is completely dry prior to storing away.
