

## ASSEMBLY INSTRUCTIONS SEG LIGHTBO

**IMPORTANT SAFETY INFORMATION:** This product has been designed for easy assembly and constructed for durability. Please take time to read and follow all instructions before start installing the unit. Be sure you fully understand all the steps needed to finish the installation.

### 1. Frame Spread out with ease

Secure the expanded frame by locking all insert buckles and 4 corners pole clip in place. Locations are shown as circled below. Ensure pop-up frame **with thumb screw feet on the ground when stand up.**

2. Connect front and back SEG insert bars to all edges of the frame. Find the “T” shaped plastic connector on both ends of the channel bar, and insert one end into the “T” slot in one connecting hub, then insert the other end. In the picture below.

3. Carefully roll out the LED ladder panel. Find the “UP” and “DOWN” stickers on light bars, which go into the top and bottom of the frame respectively. Then connect the power adapter with the power cord at the bottom of the LED panel.

4. Assemble the SEG fabric onto the front and back of the frame by inserting silicon edge into the slot. Be sure the fabric is fully stretched. Plug the power cord to light up the LED panel. The SEG lightbox is ready to use.

**Step 1: Begin by inserting the silicon strip in 4 corners. (1)**

**Step 2: Then Insert the silicon strip in the middle and side panels (2)**

**Step 3: Finish by inserting all other areas (3), you should be able to run your finger along each strip. Adjust evenly if required.**
